TRI-COLOUR

DIMMABLE
LIGHT

An aerodynamically designed 52-inch ceiling fan suitable for coastal locations with its body, canopy and blades made from durable and anti-rust ABS plastic. Utilises a powerful and efficient DC motor in combination with curved ABS blades for superior airflow.

Size	52-inch (1320mm)
Motor Type	DC (Direct Current)
Motor Wattage	35W
Construction	UV resistant ABS body and canopy
Blade Material	Moulded ABS
Blade Pitch	12 degrees
Light Wattage	24W LED
Colour Temp	Selectable 3000K / 4200K / 6000K
Light Lumens	1700lm / 1800lm / 1700lm
Light Dimmable	Yes via app or remote
Ceiling Rake	10 degrees max
Fan Drop	315mm
Control	BrilliantSmart App / 6-Speed Remote with timer
Included Features	Smart mode: nature, normal, sleep and wake up (app only).
	Windbreeze mode: varies the fan speed to simulate a natural breeze effect. Reversible for Summer/Winter Use.
Max Air Movement	14,800m ³ /hr
Min Air Movement	5,324m ³ /hr
Room Size	Small / Medium
Undercover Outdoor	Yes* (Suitable for coastal locations)
WiFi Info	IEEE802.11b/g/n, 2.4GHz
	Mac Encryption; WEP/WAPI/TKIP/AES
Device Info	iOS 8.0 or higher, Android 4.1 or higher

DC CEILING FANS

ADVANTAGES OF DC MOTOR CEILING FANS

High Efficiency

Ceiling fans with DC motors create a higher torque, meaning greater initial power and less energy consumption. DC motors consume up to 58% less energy than conventional ceiling fan motors.

Greater Control

DC motor control provides up to six speed settings and an easy to use reversing function for summer and winter operation. These motors are easier to start, stop and accelerate.

Light Weight

DC motors weigh less than conventional fans motors allowing for more attractive modern designs and a lighter product that is easier to install.

Quiet Operation

DC motors are virtually silent, ensuring a quiet operation making them a suitable options for any room in your home.

AC CEILING FANS

ADVANTAGES OF AC MOTOR CEILING FANS

Flexible Control

You can control AC fans from a wall control or remote.

You can fit any of our remote or upgraded wall controllers to our AC fans, these include Smart and a Multi-fan options to control more than one fan at a time from the same controller.

Energy Efficient

Even though AC fans are not as energy-efficient as DC fans, they use less energy than most other home appliances. Standard Brilliant models will use no more than 80W on the highest speed.

A majority of models use less.

All Year Use

AC fans feature a switch located on the motor housing to reverse the spin of the fan for use in the winter months to push warm heated air around the space.

ALL SEASON USE

BRILLIANT'S ALL-SEASONS TECHNOLOGY IS FOR USE ALL YEAR ROUND.

All Seasons technology allows you to change the direction the fan blades spin giving you the option to use your fan in Summer and Winter.

In Summer mode the air flows down and creates a breeze to create a cooling effect on your body.

Winter mode is best used on a low speed as the aim is not to create airflow, but rather, to gently push down the hottest air in the room. By bringing the warm air down from the ceiling, you can set thermostat to a lower temperature to still obtain a comfortable and warm environment whilst also saving on your heating costs.

Note: All energy saving and air movement data is produced by an accredited test lab. In home results may vary depending on circumstances and installation.

WALL CONTROLLER

Upgrade your AC ceiling fan to a remote control or specialised wall controller. See page 73 to 76 for options.

They can also be controlled using the Standard remote control 99999 & 99444, LCD model 99222, Wifi model 99111 and Touch model 88888.

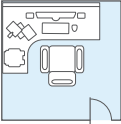

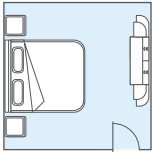

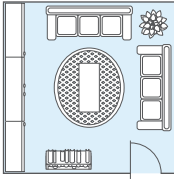

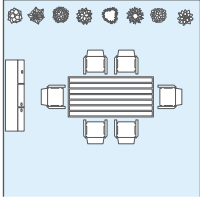

ROOM SIZE

HOW TO CHOOSE YOUR FAN

What is the right airflow for your room size? In short, airflow is the measurement of air movement generated by the fan, our published figures are based on the highest and lowest speeds of our fans to highlight speeds intended for different spaces and uses.

Selecting the right fan should be based on application rather than a fan with the highest air movement. To give you an idea, with a bedroom ceiling fan you would prefer a gentle breeze. This would mean bedroom ceiling fans are generally set to the lowest speeds, so they don't need to be high airflow fans.

In larger spaces, or if the fan will be installed in a room with a higher ceiling, then a fan with a high airflow would be more suited.

SMALL SPACES	MEDIUM SPACES	LARGE SPACES	X-LARGE SPACES
CHOOSE A 48" or SMALLER CEILING FAN	CHOOSE A 48"-56" CEILING FAN	CHOOSE A 56"-66" CEILING FAN	CHOOSE A 66" or LARGER CEILING FAN
			
Small bedrooms, offices, media rooms, walkways	Master bedrooms, living areas, dining areas	Open plan areas and outdoor spaces	Open plan areas and outdoor spaces
COVERAGE Spaces less than 3m x 3m	COVERAGE Spaces that are between 3m x 3m and 4m x 4m	COVERAGE Spaces that are between 4m x 4m and 6m x 6m	COVERAGE Spaces that are over 6m x 6m

This, of course, is a guide only and the fan size to room size guide can be adapted to suit your needs or design. A larger fan can be used in an average sized room for better airflow or looks, or you might prefer to use two smaller fans to cool a larger, long room.

Control your ceiling fans anywhere, anytime via our free app, voice control or by using the supplied remote or wall control.

Smart Features

BrilliantSmart fans and remotes offer all the features of a traditional fan (such as the speed and light control or the summer/winter modes), but they also come packed full of extra features

SLEEP MODE enables you to set a personalised night-time comfort, setting the fan to its lowest speed.

NATURE/WINDBREEZE MODE varies the fan speed to mimic a cooling breeze effect.

WAKE UP MODE acts as a cool way to wake you up during sleep. The fan and light will turn ON with the fan speed gradually increasing every 5 minutes until it reaches its maximum.

Create **SCHEDULES** or **TIMERS** to turn your fan on and off automatically, to help cool or warm your home before you get home

AUTOMATE the fans operation by setting triggers for humidity, temperature or weather conditions. This way, the ceiling fan can turn on or off and adjust its speed and direction depending on the room temperature in order to rotate the air and keep your room cooler in the summer and warmer in the winter – this helps a lot with the energy bill.

PAIRING with other BrilliantSmart products, like sensors to detect movement to turn the light or fan on or off when you enter or leave the house.

WARRANTY	1 year replacement

SMART RECEIVERS

TO SUIT AMARI SII AND VECTOR DC CEILING FANS

AMARI SII

- Turn your existing Amari DC Series II ceiling fan into a Smart Fan with our Smart Receiver
- Seamlessly replace current receiver with this model with the easy-connect plugs
- Control your ceiling fan from anywhere via the BrilliantSmart app
- Separate models for 52" (21721SMART) and 56" (21725SMART)

VECTOR DC

- Turn your existing Vector DC ceiling fan into a Smart Fan with our Smart Receiver (VECTORDCSMART)
- Seamlessly replace current receiver with this model with the easy-connect plugs
- Control your ceiling fan from anywhere via the BrilliantSmart app
- One receiver to suit all fan sizes

WALL CONTROLLER

TO SUIT SELECTED BRILLIANT DC CEILING FAN

DCWALLCONTROL
Wall control

Ceiling fan is not included. Photo used for illustration purposes only.

Modern wall controller suitable for selected Brilliant DC ceiling fans range. This controller is designed to fit into most wall switches hole (using c-clip bracket), without any additional cutout required. Must be installed by a licensed electrician.

- This wall control only needs a regular 220-240V AC power to connect (no extra wires to the fan).
- Easily pair and connect to the fan (receiver).
- Control the fan from a radius of up to 8m. No limit of number of fans pairing if inside working radius.
- 2 years warranty.

TECHNICAL SPECIFICATIONS

INPUT	Soft Buttons
FAN	ON/OFF
SPEED	6 Speed
LIGHT	ON/OFF

WORKING DISTANCE	UP TO 8m

COMPATIBLE MODELS

AMARI SII	21719, 21721, 21723, 21725
FANTASTIC	22804
SOLANA	22763, 22765
VECTOR DC	22687, 22689, 22691, 22693, 22695, 22697

WARRANTY

INSTALLATION CONDITIONS/WARRANTY

* Warranty on all fans, not including controllers, remotes or light fittings, is 6 years. The first 3 years are covered by an In-home warranty with an additional 3 year replacement only. Consumable items such as batteries and light globes will not be covered by this warranty.

PRODUCT TYPE	TOTAL WARRANTY PERIOD	IN-HOME WARRANTY PERIOD
Ceiling Fan Motor	6 Years	3 Years
Wall Controller	2 Years	2 Years
Remote Controller Set	2 Years	2 Years
Light Fittings	2 Years	2 Years

The warranted use of fans outdoors are limited to enclosed alfresco like areas where conditions are similar to indoor installations.

The warranty conditions for fans installed in enclosed alfresco areas are as follows:

- Fan must be shielded from wind and rain (enclosed area, minimum 1.5m from edge of eave/roof).
- The warranty will cover open circuit motor faults, and remote control faults if not related to outdoor exposure.
- The warranty will not cover outdoor related issues such as rusting, or failure clearly caused by water, moisture or wind.
- The warranty will not cover external appearance or finish of any part of the ceiling fan.
- The warranty will not cover wooden blades. These are recommended only to be used.

The warranty does not cover Ripple Control noise/interference (identified by a periodic or intermittent hum). This must be addressed with your energy service provider.

The warranty does not cover noises or faults due to poor installation or failure to balance fans as per instructions.
